

ABOUT THE PROCEDURE

Host

- Systemic Health: co-morbidities
- Smoking
- History of Disease

Iatrogenic Factors *(dental team /surgeon related)*

- Cement/Screw
- Occlusal Trauma
- Methods of plaque management
- Placement
- Frequency of removal and cleaning

Prosthetic Design

- Fit (Intended vs. Actual)
- Excessive stress concentration at Bone Implant Interface
- Increased risk of plaque adhesion or retention (exposed endosteal implant surface)
- Type of abutment connection

Homecare

- Plaque Control Indices
- Interdental/Sub Fixture
- Engagement

Tooth-Do List

- Annual Radiographs (BW and PA)
- Annual Photo
- Annual Medical History Update
- BP at each visit

Questions to pt

- Patient CC
- Pain or discomfort
- do you notice it?

Bite Check

- Articulating Paper
- Shimstock
- Percussion test
- Mobility Check

Homecare Questions

- Irrigation with water
- Brushing frequency/length
- Other tools being used

Tissue Documentation

- Colour
- Suppuration
- Texture
- Smell
- Consistency
- Taste

Surrounding teeth

- Spaces opening up/Shifting
- Tissue changes/BOP/Probing
- Calculus/Biofilm scores
- Wear patterns
- Unresolved Caries/Endo Lesions
