

BOOTH 200

LIVE DENTISTRY STAGE

WITNESS TWO LIVE PATIENT PROCEDURES

Last year, we introduced the Live Dentistry Stage where attendees got to witness expert clinicians performing procedures on live patients in real time. It proved to be a hit so we're bringing it back!

Day 1 | Thursday, April 18, 2024

An Implant Journey – 12:30 – 2:30 pm

This journey will include stops at the terminology definitions; immediate implant placement and loading; scientific validation of immediate implant protocols; and the evaluation of factors to achieve primary implant stability. You don't want to miss this! See it live onsite at ASM24.

Day 2 | Friday, April 19, 2024

A Restorative Procedure Using the Bioclear Method – 12:30 – 2:30 pm

Want to learn how to achieve pleasing shapes for anterior teeth and achieve a rock star polish? Injection overmolding of heated composite using the Bioclear Method offers a new treatment modality that can replace traditional bonding and indirect restorations, and Bioclear Faculty member Dr Rafael Bustamante will show you how. This live patient treatment will demonstrate the five pillars of this exciting new option and the procedure and will be narrated by Dr. David Clark.

Featuring Florian Hillen, CEO VideahHealth

Thursday, April 18 and Friday, April 19 | 11:30 am – 12:15 pm

Discover How Artificial Intelligence is Transforming the Dental Industry

Artificial Intelligence or AI is transforming the dental industry and supporting clinicians in making diagnosis and personalized treatment plans, elevating patient care to new heights. Join Mr. Hillen for an insightful look into how data-driven technologies are redefining the standards and possibilities in dental care with live demonstrations of AI-enhanced X-Ray analysis and voice-activated functionalities.
